

Zvi Marmor

A student in the Direct Track program
at ELSC

ABOUT ME

A student at the ELSC Ph.D Direct Track Program with a background in Computer Science and Computational Neuroscience. I am deeply curious about the intersection of artificial and biological neural networks, and I specialize in building neural models, developing autonomous AI agents, and integrating LLM frameworks with RAG systems. Experienced in both computational research, as well as biological and experimental data analysis

SKILLS

Languages: Python, C, C++.

AI/ML: Neural Networks construction, LLM APIs (GPT/Gemini), LangChain, RAG, Fine-tuning.

Libraries: PyTorch, Scikit-learn, Pandas, Numpy.

LANGUAGE

- Hebrew
- English

EDUCATION & EXPERIENCE

ELSC Ph.D Direct Track

2025 – Present

The Edmond & Lily Safra Center for Brain Sciences (ELSC),
The Hebrew University

AI Developer | TradingMonkeyAI (Startup)

Summer 2024

- Built an autonomous trading agent using LangChain and LangGraph orchestrators.
- Utilized APIs (GPT, Gemini) for model fine-tuning and specialized tasks.
- Developed end-to-end automated workflows for financial data processing.

Data Scientist

2024

Prof. Hermona Soreq's Lab, ELSC

- Conducted independent experiments and performed data analysis using Python, Matlab, and R.
- Developed computational tools to analyze biological datasets and experimental results.

B.Sc. in Computer Science

2022 – present

The Hebrew University of Jerusalem.

- Minor in Computational Neuroscience
- **Relevant Coursework:** Introduction to Machine Learning, Natural Language Processing (NLP), 3D Data Processing in Structural Biology, Dynamics and Coding in the Brain.

Combat Commander | Egoz Unit, IDF

2019 – 2022

Led a squad of 30 soldiers in high-risk operations, responsible for tactical planning and team management.

PROJECTS

- **NES Classifier – GNN-based Protein Signal Detection:** A Graph Neural Network pipeline built with PyTorch Geometric to detect 3D protein signals, developed during a Bio-Hackathon.
- **Azimut Kosher Kravi – IDF Fitness & AI Coaching App:** A training platform featuring an AI-powered military coach integrated via OpenAI API.
- **Spotify Track Popularity Predictor:** A Deep Learning system using PyTorch to classify song popularity.
